Preparing Tomorrow's Scientists

Interested in a Biomedical PhD but don't know where to start?

UNC PREP is specifically designed to equip and encourage students from under-represented groups interested in pursuing a PhD in the Biological and Biomedical sciences. Students who have recently completed their Bachelor's degree spend a year at UNC Chapel Hill gaining and strengthening skills needed for entry and success in top PhD programs.

Learning...

Build skills needed to be a successful scientist. PREP scholars receive intensive training in giving presentations, scientific writing, and critical analysis of scientific papers in addition to taking a graduate level course.

Research...

UNC Chapel Hill is one of the leading research universities in the nation. PREP scholars are paired with a faculty mentor of their choice and gain valuable experience participating in full-time, cutting-edge research.

Community...

UNC PREP scholars join a supportive community of students with similar career interests and goals. Weekly meetings, monthly socials, dinners, and other events provide many opportunities for PREP scholars to meet and get to know one another. UNC PREP is truly a family.

What to expect as a PREP Scholar?

- **Research** | Find out firsthand what it's like to work in a research lab. You will work closely with UNC scientists from one of over 15 biomedical disciplines such as Cell Bio, Microbiology, Genetics, Neuroscience, or Cancer Bio.
- **Lab Skills Bootcamp** | New to research? Don't worry! PREP scholars participate in an intensive hands-on course teaching common molecular biology techniques and other general biomedical lab skills.
- **Grad-level courses** | Participation in a graduate level biomedical class, along with routine review sessions, will prepare you for graduate school coursework.
- **Graduate School Apps/Interviews** | Know what to expect and feel prepared as you apply to graduate schools and go on interviews. As a PREP scholar, you'll be ready!
